Vassilikos Oil Terminal

Date	Budget (€)	Employer
2011-2013	300.00	Archirodon
	Owner	Place
	VTT-J&P	Vassilikos, Cyprus

The oil terminal at Vassilikos is used for the unloading of fuel for the needs of the Electricity Authority Power Station. Mooring is by means of SBM (Single Buoy Mooring) and the unloading is carried out again through submarine pipelines. The oil jetty is 1.5 Km long, supported **on inclined steel tubular piles**, plus 400m for the platforms and the berths. The scope of work for the tender design included the access trestle. In addition to this, our company also prepared the detailed design for the tank farm of the project.
