The processing capacity of the mechanical biological treatment (MBT) facility amounts to 410,000 tons per annum of mixed municipal solid waste (MSW) and constitutes one of the largest waste treatment facilities worldwide. The project fully covers the waste management needs of Sofia Municipality with a population of about 1.2 million. The MBT plant is constructed on a site of 106,204 m2 and the total built up area of the buildings reaches 29,700m^2.
