Golden Hall

Temps d'étude	Budget (€)	Employeur
2006-2007	25,000,000.00	LAMDA DOMI S.A.
	Proprietaire	Position
	LAMDA DEVELOPMENT	Maroussi Athens

Modification of the Athens 2004 Olympic Games International Broadcasting Venter to a mall named Golden Hall. The IBC building consists of a concrete basement and a steel superstructure with height of 14-16 m with some small intermediate levels at 6 out of the 11 structurally independent parts. The design keeps the outer shell of the superstructure adding intermediate floors for shops. Extended modifications to the structural system were required with the position of new columns and bracings, openings to existing slabs as well as special designs in order to avoid strengthening to the concrete substructure under the new increased static and seismic loads.

The Golden Hall is the second largest mall in Athens with total Gross Leasable Area (GLA) 41000 m² housing 135 shops plus 60000 m² of basement parking areas with 1400 vehicles capacity.
